

**REMARKS**

The specification and the claims have been amended to more particularly point out the present invention. It is believed that the amendments to the specification correct the informalities raised by the examiner. As discussed below, it is also believed that the amended claims 2 to 4 overcome the examiner's indefiniteness rejections. Applicants believe that no new matter was added by virtue of the amended claims and amended sections of the specification.

**Objection to Brief description of the figures**

The Examiner has objected to the brief description of figures 1,4, and 5. Applicants have amended the brief description of the figures to include a legend for each of Figures 1, 4, and 5. Support for the amendment to the brief description of Figure 1 is found on page 25, lines 7-12. Support for the amendment to the brief description of Figure 4 is found on page 39, lines 34-36 and on page 40, lines 1-5. Support for the amendment to the brief description of Figure 5 is found on page 41, lines 7-29.

**Obviousness-type double patenting rejection**

The examiner has provisionally rejected claim 7 as being unpatentable over claims 1-6 of co-pending Application No. 10/616,689 due to obviousness-type double patenting. Upon receipt of the notice of allowance, Applicant will file the requisite terminal disclaimer with the PTO.

Claims 5 and 6 indefiniteness rejection

The examiner has rejected claims 5 and 6 as indefinite due to lack of antecedent basis. Claim 4 has been amended to recite "a cloning vector" and thus the recitation of "the vector of claims 2 or 4" in claims 5 and 6 now has antecedent basis. We therefore request the Examiner withdraw the indefiniteness rejection regarding claims 5 and 6.

Claim 3 indefiniteness rejection

The examiner has also rejected claim 3 as indefinite. Amended claim 3 now recites "*Mme*I endonuclease and methyltransferase" and is now believed to be defined. Accordingly, we respectfully request the Examiner withdraw the indefiniteness rejection regarding claim 3.

Claim 7 rejections

To expedite the prosecution of this application, Applicants have withdrawn Claim 7. To avoid confusion, Applicants expressly reserve the right to file a divisional covering the subject matter encompassed by claim 7 as well as the supportive text found within the specification.

Objection to the figures

Applicants have provided marked-up versions of the drawings that address the objections of Figures 2, 3 and 7 made by the Examiner. Applicants have also enclosed replacement drawings for all the figures that include "1/16," "2/16", etc. No new matter is believed to have been added.

**CONCLUSION**

For the reasons set forth above, Applicants respectfully submit that this case is in condition for immediate allowance. Early and favorable consideration leading to prompt issuance of this Application is earnestly solicited.

Applicants petition for a three-month extension of time and submit check in the amount of \$510.00 to cover the fees. Please charge any deficiencies to Deposit Account No. 14-0740.

Respectfully submitted,
